

BRICK*HOUSE PADDLES

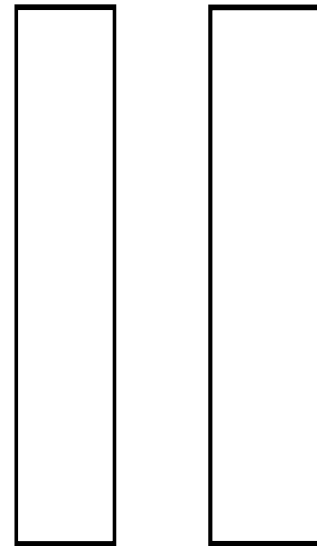

Replacement paddle trim paddle thickness varification

Use the paddle thickness box to verify your paddles thickness to test compatibility with available trim.

To verify paddle thickness you can remove the handle grip tape to expose the core or if the trim is already lose you may have access to the core.

The outer surface of the paddle must fit over top of both lines leaving just a slight bit of the line visible. See image below.

Measure the print out verification line below to ensure the print out scale is accurate.

13.5mm to 15.5mm

Thickness box

Verify printout scale is correct. This line should be 2"

Paddle should fit just slightly inside of the line of the thickness box
